

The *ETF* Review

WEEKLY • US ETF • CLIENT COCKPIT • NOT INVESTMENT ADVICE

IN BRIEF

We keep discipline ahead of activity this week. The portfolio is +7.2% since inception, the market climate remains Risk-on growth, and the largest concentration is SMH at 27.2%. This week's action: No change proposed or executed.

DISCIPLINE POINT

Main discipline point: SMH is 27.2% and remains above the soft position cap; fresh capital stays blocked until discipline gates clear.

Next action trigger: another mutation requires SMH to return within the soft position cap, or an alternative to PAVE, SMH, XLU to show confirmed relative strength, a valid pricing basis, thesis fit, and a clear funding source.

WEEKLY ETF REVIEW

Friday, 24 July 2026

Investor Report

This report is for informational and educational purposes only; please see the disclaimer at the end.

PRIMARY REGIME

Risk-on growth

GEOPOLITICAL REGIME

Elevated but localized

MAIN TAKEAWAY

No portfolio change is proposed or executed this week; SMH remains the best-supported core exposure, while fresh capital and replacement decisions remain price-, relative-strength- and portfolio-discipline gated.

2

PORTFOLIO ACTION SNAPSHOT

Recommendation	Tickers / notes
Add / destination	None
Hold	CIBR , XBI , GSG , IEFA , XLV
Hold — no further change this review	XLU , URNM , SMH , PAVE
Reflected replace / reduce	None
Close	None

PORTFOLIO DECISION STATUS

- The official portfolio state and trade ledger are authoritative for this report; this run performed no duplicate state or ledger mutation.

BEST REPLACEMENTS TO FUND

- No challenger is promoted to a fundable replacement yet. Each named replacement must first clear the same close-date pricing basis and relative-strength duel.

REGIME DASHBOARD

Macro regime

- Current regime: Risk-on growth.
- Confidence: 66%.
- Supplementary regime cross-check: A secondary rules-based assessment indicates Risk-on growth and is broadly aligned with the primary regime view. Confidence is high, reflecting consistency in the underlying evidence rather than a forecast. This supplementary check does not change portfolio actions. Pricing, relative strength and position discipline remain decisive.
- Regime memory: Risk-on growth has persisted across 8 weekly observation(s); transition state is stable, breadth is mixed, and cross-asset confirmation is mixed.
- Decision rule: Do not rotate aggressively unless a regime shift persists across at least two distinct report dates or cross-asset confirmation becomes broad.

Policy and geopolitical status

- Status: Elevated but localized.
- Fed stance: Restrictive / data-dependent. Portfolio read-through: Prefer quality, profitable growth and cash discipline over weak balance-sheet beta.
- ECB stance: On hold after June tightening / data-dependent. Portfolio read-through: [IEFA](#) exposure is already material; further allocation still requires relative-strength, pricing and portfolio-concentration confirmation.

What changed

- No material regime change was recorded versus the prior review. AI / semiconductor leadership remained dominant, while market breadth and cross-asset confirmation stayed mixed.

Portfolio implications

- Risk appetite is supportive, but fresh adds still need position-size room and pricing confirmation.
- Growth and infrastructure lanes can be considered if they do not worsen concentration.
- Defensive hedges should be reviewed for opportunity cost.

Policy catalysts included in this report

- ECB rate-policy hold: The ECB kept its key interest rates unchanged on 23 July 2026 and retained a data-dependent, meeting-by-meeting approach; this is descriptive policy context and does not override portfolio gates.
- AI infrastructure and semiconductor supply chains: Capital spending and strategic supply-chain policy continue to support semiconductor and infrastructure lanes.
- Defense and sovereign resilience: Defense-budget durability remains a structural support, but ETF vehicle choice still matters.

4

STRUCTURAL OPPORTUNITY RADAR

Theme	Primary ETF	Alternative ETF	Why it matters	Structural fit	Macro timing	Status	What needs to happen	Time horizon
Cybersecurity resilience	CIBR	BUG	Cyber spend is linked to AI, cloud, data-center and geopolitical resilience.	4	4	Actionable now	Offers digital-infrastructure exposure with less direct semiconductor cyclicality.	3-12 months
AI compute infrastructure	SMH	SOXX	Semiconductor and AI capex remains the cleanest funded structural growth lane. Macro filter: Regime and price leadership still support AI compute exposure, but concentration discipline applies.	5	5	Watchlist / under review	AI infrastructure leadership remains persistent, but position-size discipline matters.	3-12 months

Theme	Primary ETF	Alternative ETF	Why it matters	Structural fit	Macro timing	Status	What needs to happen	Time horizon
Grid buildout / electrification	PAVE	GRID	Power demand, grid bottlenecks and reshoring capex support infrastructure spend. Macro filter: AI power demand and infrastructure policy support the grid lane; funding still depends on PAVE -vs- GRID duel evidence.	5	4	Watchlist / under review	PAVE remains useful, but GRID is the cleaner thematic challenger.	3-12 months
Healthcare quality and defensive growth	XLV	VHT	Healthcare quality can provide defensive growth without speculative biotech beta.	3	3	Watchlist / under review	More useful if broad equity leadership narrows further.	3-12 months
Defense innovation / sovereign resilience	PPA	ITA	Defense spending remains structurally durable, but vehicle selection must be proven. Macro filter: Policy support is durable, but implementation quality remains the main decision bottleneck.	5	3	Non-held watchlist	Compare PPA and ITA as vehicle candidates; neither is a current holding.	3-12 months
Food security / agriculture inputs	MOO	VEGI	Agriculture inputs and food security remain structurally relevant but timing is not yet superior.	4	3	Watchlist / under review	Becomes more relevant if energy, fertilizer or crop stress rises.	3-12 months

Best structural opportunities not yet actionable

- Food security / agriculture inputs
- Water infrastructure / treatment
- Critical minerals / copper / refining

Notable lanes assessed but not promoted this week

Theme	Primary ETF	Why not promoted	What would change that
Agricultural commodities	DBA	Scored below the live radar cutoff versus stronger funded and challenger lanes.	Useful only if commodity stress becomes visible.
Broad commodity inflation hedge	GSG	Existing funded position; no additional lane promotion was granted this run.	Reassess only if relative strength, role validity, concentration or the funding case changes materially.
Biotech innovation / therapeutic platforms	XBI	Existing funded position; no additional lane promotion was granted this run.	Reassess only if relative strength, role validity, concentration or the funding case changes materially.
Power infrastructure and utilities capex	XLU	Existing funded position; no additional lane promotion was granted this run.	Reassess only if relative strength, role validity, concentration or the funding case changes materially.
Financial infrastructure and market plumbing	KCE	Scored below the live radar cutoff versus stronger funded and challenger lanes.	Useful diversifier if financial infrastructure earnings broaden.

4A. Short Opportunity Radar

Short theme	Candidate ETF	Short thesis	Trigger	Invalidation	Time horizon	Confidence
Rate-sensitive small caps	IWM	Restrictive real rates pressure weaker balance sheets.	IWM breaks down versus SPY while yields firm.	Clear easing impulse and better credit breadth.	1-3 months	Medium
China platform beta	KWEB	Policy confidence remains fragile.	Failed rally or renewed FX/policy stress.	Durable stimulus and earnings recovery.	1-3 months	Medium
Long-duration bonds	TLT	Sticky inflation and real-rate risk remain headwinds.	Real yields rise again.	Growth scare and decisive lower-yield breakout.	1-3 months	Medium
Speculative clean-tech beta	ICLN	Financing pressure and weak profitability remain issues.	Failure to recover in broad risk-on tape.	Sharp rate relief or major policy surprise.	3-12 months	Medium

5

KEY RISKS / INVALIDATORS

- [SMH](#) is 27.16% of the portfolio and therefore exceeds the 25% soft position cap; additional capital is blocked.
- [URNM](#) remains a material negative contributor and [XLU](#) is too small for an efficient partial trade; both belong in the close-first review while the portfolio has 9 positions against a maximum of 8.
- [PAVE](#) is a current holding under implementation and replacement review versus [GRID](#).
- The [GSG](#) hedge role must be re-earned periodically and is not an automatic stabilizer.
- [IEFA](#) provides a material developed-ex-U.S. allocation (24.66%); further expansion requires relative-strength and concentration confirmation.

6

BOTTOM LINE

- **Portfolio stance:** this review proposes no position or cash change; official share quantities remain unchanged.

- **Best-supported exposure:** [SMH](#) remains the strongest structural growth exposure, but its current weight is above the soft cap.
- **Main discipline point:** restore active positions from 9 to no more than 8 before opening any new ticker.
- **Current implementation reviews:** [PAVE](#) versus [GRID](#), the [GSG](#) hedge role, and the close-first ranking of [URNM](#) and [XLU](#).
- **Watchlist separation:** [PPA](#) versus [ITA](#) is solely a comparison of non-held defense instruments and is not a portfolio risk.

EQUITY CURVE AND PORTFOLIO DEVELOPMENT

- Starting capital (EUR): 100000.00
- Current portfolio value (EUR): 107189.79
- Since inception return (%): 7.19

WEEKLY ETF REVIEW

Friday, 24 July 2026

Analyst Report

1

ASSET ALLOCATION MAP

Segment	Stance	Explanation
U.S. equities	Neutral	Investable, but portfolio concentration risk is explicit.
Developed markets outside the U.S.	Neutral	IEFA represents 24.66% of the portfolio; further expansion is not automatic.
Emerging markets	Underweight	USD and commodity sensitivity remain headwinds.
Large cap	Neutral	Quality leadership remains useful.
Small cap	Underweight	Rates and refinancing remain restrictive.

Segment	Stance	Explanation
Growth	Neutral	Selective growth led by SMH remains attractive but concentration-capped.
Quality	Overweight	Earnings durability remains valuable.
Commodities / hedge	Neutral	The GSG hedge role remains under periodic validation.
Industrials / defense	Watchlist	The structural defense case is valid; PPA and ITA are non-held vehicle candidates.
Currency and regional exposure	Monitor	IEFA creates developed-ex-U.S. exposure; currency and regional concentration must be monitored separately.

2

SECOND-ORDER EFFECTS MAP

Driver	First-order effect	Second-order effect	Likely beneficiaries	Vulnerable segments	ETF implication	Timing	Confidence
SMH concentration	SMH remains the cleanest funded growth exposure	A weight above 25% increases factor and position risk	SMH , SOXX	Overlapping AI and semiconductor beta	No additional capital; monitor reduction or replacement evidence	Immediate	High
PAVE implementation	The infrastructure thesis remains valid	GRID may prove to be a cleaner vehicle	PAVE , GRID	Insufficient thematic purity	Keep the PAVE -versus- GRID review active	1-3 months	Medium
Defense watchlist	Defense spending remains structurally relevant	Vehicle selection between PPA and ITA remains unproven	PPA , ITA	Poor ETF implementation	Non-held watchlist comparison; no portfolio action	3-12 months	Medium
Commodity hedge	GSG can diversify supply and inflation risk	Opportunity cost rises if the hedge role does not confirm	GSG , DBC , cash	Unproductive hedge position	Revalidate the GSG role periodically	Immediate	Medium

3

CURRENT POSITION REVIEW

Ticker	Action	Score	Fresh cash	Role	Required next action
CIBR	Hold	4.97	Hold / monitor	Portfolio allocation	review priority 30.00. Monitor relative strength and portfolio concentration.
GSG	Hold	3.59	Hold / monitor	Portfolio allocation	review priority 10.00. Monitor commodity breadth and hedge contribution after execution.
IEFA	Hold	3.52	Hold / monitor	Portfolio allocation	review priority 10.00. Monitor non-U.S. breadth and SPY-relative performance.
PAVE	Hold — no further change this review	4.18	Smaller / under review	Portfolio allocation	review priority 67.00. Complete PAVE-versus-GRID implementation duel.
SMH	Hold — no further change this review	4.28	Smaller / under review	Growth engine	review priority 70.00. Force alternative duel; upgrade, reduce, replace, or close
URNM	Hold — no further change this review	3.70	Hold	Strategic energy	review priority 90.00. Hold
XBI	Hold	4.36	None	Portfolio allocation	review priority 20.00. None
XLU	Hold — no further change this review	3.00	No / under review	Portfolio allocation	review priority 90.00. Review defensive ballast role versus BIL/SHV and opportunity cost.
XLV	Hold	4.38	Hold / monitor	Portfolio allocation	review priority 10.00. More useful if broad equity leadership narrows further.

4

BEST NEW OPPORTUNITIES

- [SMH](#) remains the best earned exposure, but no fresh capital is added while it is above the 25% max-position cap.
- [PPA](#) / [ITA](#) (non-held watchlist comparison): Defense spending remains structurally durable, but vehicle selection must be proven.
- [MOO](#) / VEGI: Agriculture inputs and food security remain structurally relevant but timing is not yet superior.
- Replacement candidates remain evidence-gated: pricing basis and duel status must be visible before funding.

4B

REPLACEMENT DUEL TABLE

Current holding	Challenger	1m edge	3m edge	Pricing basis	Decision	Required trigger
PAVE	GRID	-4.27%	-6.21%	Current and challenger closes validated on 2026-07-24 / 2026-07-24.	Current holding still leads; no replacement.	Needs sustained relative outperformance.
URNM	URA	-1.85%	-0.86%	Current and challenger closes validated on 2026-07-24 / 2026-07-24.	Current holding still leads; no replacement.	Needs sustained relative outperformance.
SMH	SOXX	-3.05%	+3.09%	Current and challenger closes validated on 2026-07-24 / 2026-07-24.	Challenger improving; keep duel active.	Needs repeat 3m edge and capital source.
PAVE	XLU	+2.71%	-1.48%	Current and challenger closes validated on 2026-07-24 / 2026-07-24.	Early 1m improvement only; wait for 3m confirmation.	Needs 3m confirmation.
PAVE	VPU	+2.38%	-2.01%	Current and challenger closes validated on 2026-07-24 / 2026-07-24.	Early 1m improvement only; wait for 3m confirmation.	Needs 3m confirmation.
URNM	NLR	-0.55%	+2.36%	Current and challenger closes validated on 2026-07-24 / 2026-07-24.	Challenger improving; keep duel active.	Needs repeat 3m edge and capital source.
URNM	NUCL	-36.82%	-30.70%	Current and challenger closes validated on 2026-07-24 / 2026-07-24.	Current holding still leads; no replacement.	Needs sustained relative outperformance.
SMH	IRBO	-2.19%	-7.74%	Current and challenger closes validated on 2026-07-24 / 2026-07-17.	Current holding still leads; no replacement.	Needs sustained relative outperformance.

5

PORTFOLIO ROTATION PLAN

Close	Reduce	Hold	Hold — no further change this review	Add / destination	Replace
None	None	CIBR , XBI , GSG , IEFA , XLV	XLU , URNM , SMH , PAVE	None	None

6

FINAL ACTION TABLE

Weight basis note: action-table weights are target allocation weights; current-holdings weights are live market-value weights including cash. Small differences can occur when cash, rounding or execution constraints is included.

Execution-constraint note: The model would normally force reduce/replace review, but the position is too small or operationally impractical to trade this run.

Ticker	ETF	Current weight	Target weight	Delta weight	Action	Capital destination	review priority	Decision rationale	Execution constraint status
CIBR	CIBR	18.35	18.35	0.00	Hold	-	30.00	Position has become a material performance drag; Portfolio contribution is negative; Role under review	No
GSG	GSG	10.05	10.05	0.00	Hold	-	10.00	Role under review	No
IEFA	IEFA	24.66	24.66	0.00	Hold	-	10.00	Role under review	No
PAVE	Global X U.S. Infrastructure Development ETF	5.06	5.06	0.00	Hold — no further change this review	-	67.00	Fresh capital only after review or at smaller size; Position is under replacement review; Review has persisted for multiple report cycles; A stronger alternative is available; complete the PAVE -versus- GRID review	Execution constraint: weekly rotation limit reached
SMH	VanEck Semiconductor ETF	27.16	27.16	0.00	Hold — no further change this review	-	70.00	Fresh capital only after review or at smaller size; Position is under replacement review; Review has persisted for multiple report cycles	Execution constraint: portfolio capacity blocks action
URNM	Sprott Uranium Miners ETF	1.95	1.95	0.00	Hold — no further change this review	-	90.00	Position has become a material performance drag; Position has become a large performance drag; P/L below -20%; material loss requires full re-underwriting	Execution constraint: position too small for an efficient trade
XBI	XBI	4.94	4.94	0.00	Hold	-	20.00	Portfolio contribution is negative; Role under review	No
XLU	XLU	0.53	0.53	0.00	Hold — no further change this review	-	90.00	Position does not pass the fresh-capital test; Position is under replacement review; Review has persisted for multiple report cycles	Execution constraint: position too small for an efficient trade
XLV	XLV	4.93	4.93	0.00	Hold	-	10.00	Role under review	No

Source	Destination	Source delta %	Destination delta %	Estimated notional EUR	Intent status	Rationale
None	None	0.00	0.00	0.00	No proposed rotation	No actionable rotation proposal was generated this run.

Watchlist / dynamic radar memory

Theme	Primary ETF	Alternative ETF	Why it is on the radar	Status
AI compute infrastructure	SMH	SOXX	SMH is the funded core holding; SOXX is a non-held challenger.	Funded / concentration-capped
Defense innovation / sovereign resilience	PPA	ITA	Structural defense case; both ETFs are research candidates only.	Non-held watchlist comparison
Grid buildout / electrification	PAVE	GRID	PAVE is the current holding; GRID is the non-held replacement challenger.	Current holding under replacement review
Commodity and hedge breadth	GSG	DBC / BIL	GSG is the current holding; hedge function and opportunity cost require confirmation.	Current holding under role validation
Developed markets outside the U.S.	IEFA	EFA	IEFA is the funded current holding; EFA is a comparison instrument only.	Funded / monitor

Recommendation discipline continuity

- [SMH](#): current holding under concentration discipline; no additional capital above the soft cap.
- [PAVE](#): current holding; direct replacement analysis versus non-held challenger [GRID](#) remains required.
- [GSG](#): current holding; hedge role and opportunity cost remain under validation.
- [URNM](#) and [XLU](#): current holdings in the close-first review while the portfolio remains at 9/8 positions.
- [PPA](#) and [ITA](#): non-held defense-watchlist instruments; no current position and no execution authority.
- [SPY](#): benchmark only for market and relative-strength comparisons; no current position.

Constraints

- Max position size: 25% soft cap; current inherited overweights require no-fresh-cash and review/trim discipline
- Max number of positions: 8 soft target; current inherited count may exceed this until guarded rotation reduces it
- UCITS only: No
- Leverage ETFs allowed: No
- Drawdown tolerance: Moderate
- Income vs growth preference: Balanced growth with resilience bias

Changes since last review

- Portfolio changes: none; share quantities, active tickers and cash were unchanged in this review.

- Valuation: refreshed using the requested report-date closing-price set.
- Research status: [PAVE](#)-versus-[GRID](#), [GSG](#) role validation and the close-first review remain active; [PPA](#)-versus-[ITA](#) remains watchlist research only.
- Thesis changes: no structural thesis was abandoned.
