

The *ETF* Review

WEEKLY ● US ETF ● CLIENT COCKPIT · NOT INVESTMENT ADVICE

IN BRIEF

A controlled rotation was executed this week: PAVE added · XLU reduced. The portfolio is +7.1% since inception, the market climate remains Risk-on growth, and the largest concentration is SMH at 27.4%.

DISCIPLINE POINT

Main discipline point: SMH is 27.4% and remains above the soft position cap; fresh capital stays blocked until discipline gates clear.

Next action trigger: another mutation requires SMH to return within the soft position cap, or an alternative to PAVE, SMH, XLU to show confirmed relative strength, a valid pricing basis, thesis fit, and a clear funding source.

WEEKLY ETF REVIEW

Thursday, 16 July 2026

Investor Report

This report is for informational and educational purposes only; please see the disclaimer at the end.

PRIMARY REGIME

Risk-on growth

GEOPOLITICAL REGIME

Elevated but localized

MAIN TAKEAWAY

The portfolio executed one controlled rotation: reduced XLU and added PAVE; further changes remain subject to fresh pricing, relative-strength and concentration confirmation.

2

PORTFOLIO ACTION SNAPSHOT

Recommendation	Tickers / notes
Add / destination	PAVE , XLV
Hold	CIBR , GSG , IEFA , PAVE , SMH , URNM , XBI , XLU , XLV
Hold — no further change this review	PAVE , XLV remain under explicit review.
Reflected replace / reduce	XLU → PAVE
Close	None

ROTATION EXECUTION STATUS

- portfolio rotation is already reflected in the official portfolio state and trade ledger; this run performed no duplicate state or ledger mutation.

BEST REPLACEMENTS TO FUND

- The portfolio rotation [XLU](#) → [PAVE](#) is already reflected in the official portfolio state and trade ledger; no duplicate state or ledger mutation was performed by this report render.

3

REGIME DASHBOARD

Macro regime

- Current regime: Risk-on growth.
- Confidence: 66%.
- Supplementary regime cross-check: A secondary rules-based assessment indicates Risk-on growth and is broadly aligned with the primary regime view. Confidence is high, reflecting consistency in the underlying evidence rather than a forecast. This supplementary check does not change portfolio actions. Pricing, relative strength and position discipline remain decisive.
- Regime memory: Risk-on growth has persisted across 64 weekly observations; transition state is stable, breadth is improving, and cross-asset confirmation is mixed.
- Decision rule: Do not rotate aggressively unless a regime shift persists for at least two runs or cross-asset confirmation becomes broad.

Policy and geopolitical status

- Status: Elevated but localized.
- Fed stance: Restrictive / data-dependent. Portfolio read-through: Prefer quality, profitable growth and cash discipline over weak balance-sheet beta.
- ECB stance: Tightening / inflation-sensitive. Portfolio read-through: [IEFA](#) exposure is now present, but further non-U.S. developed allocations still require relative-strength, pricing and portfolio-discipline confirmation.

What changed

- No material regime change was recorded versus the prior review. AI / semiconductor leadership remained dominant, while market breadth and cross-asset confirmation stayed mixed.

Portfolio implications

- Risk appetite is supportive, but fresh adds still need position-size room and pricing confirmation.
- Growth and infrastructure lanes can be considered if they do not worsen concentration.
- Defensive hedges should be reviewed for opportunity cost.

Policy catalysts included in this report

- AI infrastructure and semiconductor supply chains: Capital spending and strategic supply-chain policy continue to support semiconductor and infrastructure lanes.
- Defense and sovereign resilience: Defense-budget durability remains a structural support, but ETF vehicle choice still matters.

4

STRUCTURAL OPPORTUNITY RADAR

Theme	Primary ETF	Alternative ETF	Why it matters	Structural fit	Macro timing	Status	What needs to happen	Time horizon
Cybersecurity resilience	CIBR	BUG	Cyber spend is linked to AI, cloud, data-center and geopolitical resilience.	4	4	Actionable now	Offers digital-infrastructure exposure with less direct semiconductor cyclicity.	3-12 months
AI compute infrastructure	SMH	SOXX	Semiconductor and AI capex remains the cleanest funded structural growth lane. Macro filter: Regime and price leadership still support AI compute exposure, but concentration discipline applies.	5	5	Structurally actionable, but no fresh capital while above cap	AI infrastructure leadership remains persistent, but position-size discipline matters.	3-12 months
Healthcare quality and defensive growth	XLV	VHT	Healthcare quality can provide defensive growth without speculative biotech beta.	3	3	Watchlist / under review	More useful if broad equity leadership narrows further.	3-12 months

Theme	Primary ETF	Alternative ETF	Why it matters	Structural fit	Macro timing	Status	What needs to happen	Time horizon
Biotech innovation / therapeutic platforms	XBI	IBB	Biotech remains a long-duration innovation lane but needs risk appetite.	4	3	Watchlist / under review	Can become attractive if breadth improves and rates ease.	3-12 months
Grid buildout / electrification	PAVE	GRID	Power demand, grid bottlenecks and reshoring capex support infrastructure spend. Macro filter: AI power demand and infrastructure policy support the grid lane; funding still depends on PAVE -vs- GRID duel evidence.	5	4	Watchlist / under review	PAVE remains useful, but GRID is the cleaner thematic challenger.	3-12 months
Water infrastructure / treatment	FIW	PHO	Water scarcity and treatment capex remain durable, but near-term leadership is modest.	4	3	Watchlist / under review	Moves up if relative strength improves versus PAVE/GRID .	3-12 months

Best structural opportunities not yet actionable

- Food security / agriculture inputs
- Water infrastructure / treatment
- Critical minerals / copper / refining

Notable lanes assessed but not promoted this week

Theme	Primary ETF	Why not promoted	What would change that
Food security / agriculture inputs	MOO	Scored below the live radar cutoff versus stronger funded and challenger lanes.	Becomes more relevant if energy, fertilizer or crop stress rises.
Power infrastructure and utilities capex	XLU	Scored below the live radar cutoff versus stronger funded and challenger lanes.	Offers a more defensive grid-adjacent expression if cyclical weakens.
Agricultural commodities	DBA	Scored below the live radar cutoff versus stronger funded and challenger lanes.	Useful only if commodity stress becomes visible.
Broad commodity inflation hedge	GSG	Scored below the live radar cutoff versus stronger funded and challenger lanes.	Useful only if commodity breadth confirms.
Defense innovation / sovereign resilience	PPA	Scored below the live radar cutoff versus stronger funded and challenger lanes.	The lane remains relevant, but PPA must justify itself versus ITA .

4A. Short Opportunity Radar

Short theme	Candidate ETF	Short thesis	Trigger	Invalidation	Time horizon	Confidence
Rate-sensitive small caps	IWM	Restrictive real rates pressure weaker balance sheets.	IWM breaks down versus SPY while yields firm.	Clear easing impulse and better credit breadth.	1-3 months	Medium
China platform beta	KWEB	Policy confidence remains fragile.	Failed rally or renewed FX/policy stress.	Durable stimulus and earnings recovery.	1-3 months	Medium
Long-duration bonds	TLT	Sticky inflation and real-rate risk remain headwinds.	Real yields rise again.	Growth scare and decisive lower-yield breakout.	1-3 months	Medium
Speculative clean-tech beta	ICLN	Financing pressure and weak profitability remain issues.	Failure to recover in broad risk-on tape.	Sharp rate relief or major policy surprise.	3-12 months	Medium

5

KEY RISKS / INVALIDATORS

- [SPY](#) plus [SMH](#) creates high U.S. tech / AI factor overlap.
- Hedge and defensive sleeves must justify their capital allocation through role validity, pricing and relative-strength evidence.
- [PPA](#) and [PAVE](#) remain replaceable until their ETF implementation quality is proven.
- [IEFA](#) now provides a material non-U.S. developed-market allocation (24.63%); further expansion still requires relative-strength and concentration confirmation.

6

BOTTOM LINE

- **What was reduced or exited first:** [XLU](#); the allocation change has been completed.
- **What received additional capital:** [PAVE](#); no further capital is deployed after the completed major rotation.

- **What is acceptable but replaceable:** Holdings with the weakest capital-efficiency profile remain candidates for reduction or replacement.
- **Single best portfolio upgrade this week: Portfolio rotation completed:** reduced [XLU](#) from 5.49% to 0.52% of NAV; added [PAVE](#) at 4.96% of NAV.

EQUITY CURVE AND PORTFOLIO DEVELOPMENT

- Starting capital (EUR): 100000.00
- Current portfolio value (EUR): 107117.94
- Since inception return (%): 7.12
- Equity-curve state: Reconciled to Section 15 with full valuation history
- EUR/USD used: 1.1443
- Notes: Section 7 uses the validated valuation history plus the current portfolio NAV; Section 15 is rendered from the same reconciled portfolio state.

WEEKLY ETF REVIEW

Thursday, 16 July 2026

Analyst Report

1

ASSET ALLOCATION MAP

Bucket	Stance	Reason
US equities	Neutral	Investable but concentration risk is explicit.
Europe equities	Neutral	IEFA already represents 24.63% of the portfolio; further expansion is not automatic and remains relative-strength and concentration gated.
EM equities	Underweight	USD and oil sensitivity remain headwinds.
large cap	Neutral	Quality leadership still works.
small cap	Underweight	Rates and refinancing remain difficult.
growth	Neutral	Selective growth led by SMH remains attractive.
quality	Overweight	Earnings durability remains valuable.

Bucket	Stance	Reason
defensive ballast	Neutral	Hedge and cash-like roles remain under opportunity-cost review.
industrials / defense	Overweight	Structural thesis valid; vehicle under review.
non-USD assets	Watchlist	The portfolio already carries 24.63% non-U.S. developed-market exposure through IEFA ; currency and regional concentration therefore require active monitoring.

2

SECOND-ORDER EFFECTS MAP

Driver	First-order effect	Second-order effect	Likely beneficiaries	Likely losers	ETF implication	Timing	Confidence
AI leadership	SMH remains the cleanest growth expression	Concentration must be watched	SMH , SOXX	Lower-quality cyclicals	Hold near max size	Immediate	High
Factor concentration	SPY and SMH overlap	Portfolio is less diversified than ticker count suggests	QUAL as a quality alternative and IEFA as an already funded diversifier	Overlapping U.S. beta	Keep SPY under review	1-3 months	Medium
Defense thesis vs ETF implementation	Defense remains structurally valid	PPA must justify itself versus ITA	ITA , PPA	Weak vehicle selection	Hold PPA under review	Immediate	Medium
Hedge drawdown	Hedge role must be proven	GSG/BIL remain challengers	GSG , BIL , cash	Unproductive hedge	Hold hedge sleeve under review	Immediate	Medium

3

CURRENT POSITION REVIEW

Ticker	Action	Score	Fresh cash	Role	Required next action
CIBR	hold	4.97	Hold / monitor	Portfolio allocation	Monitor relative strength and portfolio concentration.
GSG	hold	3.59	Hold / monitor	Portfolio allocation	Monitor commodity breadth and hedge contribution after execution.

Ticker	Action	Score	Fresh cash	Role	Required next action
IEFA	hold	3.52	Hold / monitor	Portfolio allocation	Monitor non-U.S. breadth and SPY-relative performance.
PAVE	Add from rotation	4.25	Smaller / under review	Portfolio allocation	Complete PAVE-versus-GRID implementation duel.
SMH	hold	4.28	Smaller / under review	Growth engine	Force alternative duel; upgrade, reduce, replace, or close
URNM	hold_with_override	3.70	Hold	Strategic energy	Hold
XBI	hold	4.36	None	Portfolio allocation	None
XLU	hold_with_override	3.00	No / under review	Portfolio allocation	Review defensive ballast role versus BIL/SHV and opportunity cost.
XLV	Add from rotation	4.38	Hold / monitor	Portfolio allocation	More useful if broad equity leadership narrows further.

4

BEST NEW OPPORTUNITIES

- [SMH](#) remains the best earned exposure, but no fresh capital is added while it is above the 25% max-position cap.
- Executed rotation: Portfolio rotation completed: reduced [XLU](#) from 5.49% to 0.52% of NAV; added [PAVE](#) at 4.96% of NAV.
- [PAVE](#) / [GRID](#): Power demand, grid bottlenecks and reshoring capex support infrastructure spend.
- [FIW](#) / [PHQ](#): Water scarcity and treatment capex remain durable, but near-term leadership is modest.
- Replacement candidates remain evidence-gated: pricing basis and duel status must be visible before funding.

4B

REPLACEMENT DUEL TABLE

Current holding	Challenger	1m edge	3m edge	Pricing basis	Decision	Required trigger
PAVE	GRID	-3.93%	-6.06%	Current and challenger closes validated on 2026-07-16 / 2026-07-16.	Current holding still leads; no replacement.	Needs sustained relative outperformance.
URNM	URA	-2.94%	+0.43%	Current and challenger closes validated on 2026-07-16 / 2026-07-16.	Challenger improving; keep duel active.	Needs repeat 3m edge and capital source.
SMH	SOXX	-2.45%	+5.69%	Current and challenger closes validated on 2026-07-16 / 2026-07-16.	Replacement trigger watch - challenger leading over 3m.	Confirm thesis fit, liquidity and funding source.
PAVE	XLU	+5.19%	-6.05%	Current and challenger closes validated on 2026-07-16 / 2026-07-16.	Early 1m improvement only; wait for 3m confirmation.	Needs 3m confirmation.
PAVE	VPU	+4.94%	-6.22%	Current and challenger closes validated on 2026-07-16 / 2026-07-16.	Early 1m improvement only; wait for 3m confirmation.	Needs 3m confirmation.
URNM	NLR	-0.25%	+1.97%	Current and challenger closes validated on 2026-07-16 / 2026-07-16.	Challenger improving; keep duel active.	Needs repeat 3m edge and capital source.
URNM	NUCL	-25.94%	-24.85%	Current and challenger closes validated on 2026-07-16 / 2026-07-16.	Current holding still leads; no replacement.	Needs sustained relative outperformance.
SMH	IRBO	+6.51%	+3.83%	Current and challenger closes validated on 2026-07-16 / 2026-07-10.	Challenger improving; keep duel active.	Needs repeat 3m edge and capital source.

5

PORTFOLIO ROTATION PLAN

Close	Reduce	Hold	Add	Replace
None	XLU	CIBR , GSG , IEFA , PAVE , SMH , URNM , XBI , XLU , XLV	PAVE , XLV	XLU → PAVE

- portfolio rotation is already reflected in the official portfolio state and trade ledger; this run performed no duplicate state or ledger mutation.

FINAL ACTION TABLE

Weight basis note: action-table weights are target allocation weights; current-holdings weights are live market-value weights including cash. Small differences can occur when cash, rounding or execution constraints is included.

Execution note: The model would normally force reduce/replace review, but the position is too small or operationally impractical to trade this run.

Ticker	ETF	Existing/ New	Weight Inherited	Target Weight	Suggested Action	Conviction Tier	Total Score	Portfolio Role	Better Alternative Exists?	Short Reason
CIBR	CIBR	Existing	18.97	18.97	Hold	Tier 2	4.97	Portfolio allocation	No	Cybersecurity exposure remains structurally supported by AI, cloud and resilience spending.
GSG	GSG	Existing	9.43	9.43	Hold	Tier 2	3.59	Portfolio allocation	No	Added as current commodity-breadth hedge exposure after the prior gold-sleeve exit.
IEFA	IEFA	Existing	24.63	24.63	Hold	Tier 3	3.52	Portfolio allocation	No	Diversifies U.S. factor concentration but still needs relative-strength confirmation.
PAVE	Global X U.S. Infrastructure Development ETF	New	0.00	4.96	Add — executed	Tier 2	4.25	Portfolio allocation	Yes	Infrastructure thesis remains attractive, but GRID is the clean challenger.
SMH	VanEck Semiconductor ETF	Existing	27.38	27.38	Hold	Tier 1	4.28	Growth engine	No	Best earned exposure, but no fresh cash while above the 25% cap
URNM	Sprott Uranium Miners ETF	Existing	1.91	1.91	Hold — no further change this review	Tier 2	3.70	Strategic energy	No	Valid, but not better than SMH for new cash today
XBI	XBI	Existing	4.96	4.96	Hold	Tier 2	4.36	Portfolio allocation	None	Biotech remains a long-duration innovation lane but needs risk appetite.
XLU	XLU	Existing	5.49	0.52	Reduce — executed	Tier 3	3.00	Portfolio allocation	Yes	Defensive utility exposure must justify its role versus cash and broader ballast alternatives.

Ticker	ETF	Existing/ New	Weight Inherited	Target Weight	Suggested Action	Conviction Tier	Total Score	Portfolio Role	Better Alternative Exists?	Short Reason
XLV	XLV	Existing	4.88	4.88	Hold	Tier 2	4.38	Portfolio allocation	No	Healthcare quality can provide defensive growth without speculative biotech beta.

POSITION CHANGES REFLECTED IN OFFICIAL STATE

Ticker	Previous weight %	New weight %	Weight change %	Shares delta	Action reflected	Funding source / note
XLU	5.49	0.52	-4.97	-134.00	Sell	Implemented change: reduce XLU to fund PAVE .
PAVE	0.00	4.96	4.96	107.00	Buy	Implemented change: buy PAVE funded by XLU .
CASH	-	2.37	-	0.00	None	Residual cash

Available cash

- Cash %: 2.37
- Margin usage %: 0.00
- Leverage allowed: No

Watchlist / dynamic radar memory

Theme	Primary ETF	Alternative ETF	Why I'm considering it	Current status
AI compute infrastructure	SMH	SOXX	Strongest secular growth exposure.	Active / capped
Defense innovation / sovereign resilience	PPA	ITA	Defense thesis valid but vehicle under review.	Duel required
Grid buildout / electrification	PAVE	GRID	Infrastructure capex remains valid.	Duel required
Commodity-breadth hedge review	GSG	DBC / BIL	Current commodity-breadth hedge role must be proven against cash and broad commodity alternatives.	Under review
Non-U.S. developed diversification	IEFA	EFA	IEFA already provides a material non-U.S. developed-market allocation (24.63%); further changes require relative-strength and concentration evidence.	Watchlist

Recommendation discipline continuity

- Rotation execution: completed and persisted in the official portfolio state and trade ledger.
- Replacement challengers: not fundable without completed duel.

Constraints

- Max position size: 25% soft cap; current inherited overweights require no-fresh-cash and review/trim discipline
- Max number of positions: 8 soft target; current inherited count may exceed this until guarded rotation reduces it
- UCITS only: No
- Leverage ETFs allowed: No
- Drawdown tolerance: Moderate

- Income vs growth preference: Balanced growth with resilience bias

Changes since last review

- Added: the latest portfolio rotation is already reflected in the official portfolio state; no duplicate execution was performed.
- Reduced: None unless explicit state says otherwise.
- Closed: None.
- Thesis changes: No structural thesis was abandoned; implementation, macro-regime and rotation discipline are materially tighter.
